

Beyond the Basics: Green Infrastructure for Clean Water

The Conservation Foundation presents a full-day seminar that will take an in-depth look at effective stormwater management techniques. From the individual site to the city scale and beyond, there are ways to reduce stormwater runoff and help keep our groundwater clean. We'll examine completed projects, what it took to get them done and how they are functioning so far.

Get the information you need to make a difference in your community. Who should attend:

- Concerned citizen
- Plan commissioner
- Elected official
- Engineering Consultant
- Landscape Architect
- Municipal staff from
 - Engineering Dept.
 - Public Works Dept.
 - Planning Dept.
 - Building Dept.
