

WATER

FRIEND OR FOE

WATER: FRIEND OR FOE

The 30th Street Industrial Corridor, in the heart of Milwaukee, has a rich history as a manufacturing hub and remains home to large corporations as well as small and mid-sized businesses. As we redevelop this district, water will play an important role both in attracting new businesses and managing storm water in this urban area. Join us for a discussion on water, one of our most powerful resources, as we look at both the opportunities it brings and preventing the damage it can cause.
